

MEDIA ADVISORY

Contact: Steven Rybicki, (571) 431-0835

With Veterans Day approaching, there are opportunities in your area to speak with certified prosthetists who have assisted in the rehabilitation of wounded troops. These professionals offer care to amputees and support these soldiers who, with technological advances in the development of artificial limbs, are leading productive lives in spite of their battlefield injuries.

Please contact Steven Rybicki, Communications Coordinator of the American Orthotic & Prosthetic Association, for more information about these O&P professionals.
